

Apollo Four Forty "Omega Point"

Visit "[Omega Point](#)" on MotoLyrics.com

Hey what's this?
Yea, excellent I love this kind of stuff
Is this your track or is this?
Hey, have you just put some ? ? ?

No longer any place mother nature can hide now
Far from space culture
Dazzling, spacial

That the instant the omega point's reached ...
With gain control of all matter and forces
Now all mean a single universe
But in all universes in existence is logically possible

Life will spread to all spacial regions in all universes
Which can logically exist

We have stored an infinite amount of information
Including all this knowledge which is logically possible
to know
No longer any place mother nature can hide
Far from space culture

Exude your phenomena, exude the phenomena

Turn it on, dazzling, spacial

The mayan calendar, the most concentric figuration of
recorded time.
You know the axis of the northern star shifts, like, two
inches every year?
And it ends in the year 2000...11, on the new year's of
2011, in the last
Half-hour
Is aaa when time speeds up

Come back, dazzling, spacial
Distant cosmos
