preFrontal Lobotomy - Leonard Lake

Leonard Lake would kidnap people,
Cut them into pieces and set them on fire.
After he had tortured them in his dungeon
Made from an old bunker to meet his desires

He vidoetaped his tortures and murdures
So he could enjoy them over and over again.
Well, Leonard is dead now. That means he has stopped now,.
I wonder when we'll see his likes again.

(It's a really eeerie voice on the recording, probably
due to a combination of intent and poor quality
euipment. Here's the 2nd verse):

Leonard Lake was caught shoplifting
While he was driving a victim's car
You'd certainly think that anyone would realize
That is'nt the way you will
Get very far.
They were set to release him, but Leonard took cyanide
That started them looking; to fine what he'd hidden away.
It's likely if Leonard hadn't been so stupid
He would still be butchering people today.
