

## Presidents of the United States of America, The "Volcano"

Visit "[Volcano](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Under the island... middle of the mountain  
There is a big bad... boomin system'  
Blowin' speakers... woofers and tweeters  
Amplifiers... melted wires  
The party exploded... the core is corroded  
Under ground... the Puget Sound  
Cause a shiftin'... and a driftin'  
The big black boom box... stuck in the hot rock  
It's in there flowin'... in there growin'  
You don't believe me... that this scenery  
Could be a cold blooded killer

It's gonna blow... Volcano

Now the island is shiftin'... The plates are liftin'  
The core is creamy... docile and dreamy  
Stopped up and steamy  
Happy campers... poop in their pampers  
When the mountain... becomes a fountain  
Of white hot lava... molten magma  
Super sonic... plate tectonics  
Stereo phonic... lava and tonic  
The boom is bionic  
Sony shut down... Magnavox melt down  
Ballistic breakdown  
Hi-fi heatwave... lo-fi lava cave  
That sulfur smells... Mt. St. Helens  
Pompeii was yellin'...

It's gonna blow... Volcano
