Oh victim your tired song has fallen deaf ears
Oh victim your cries made it to heaven
But the angels didn't care

So I'll just give up from the 90ft drop
Maybe they'll hear me when
My fists hit the gates

The graves that you've made they're cold know
And they bite down to the bone
Victim I know so bury them deep sp the scars don't
show

Oh victim the enemy is closer than you know
It's hides inside where every hit you've taken
Hold a knife upto your throat
