Take me, I am yours.
You don't have to beg and plead
when I'm finished with your body.
She's a brain [x3]
She is not quite what I wanted,
she is not quite what I need.
Someone said she was cerebral,
but I don't know what that means.
Please explain... She's a brain [x3]

Take me, I am yours.[x2]
She said take me I implore you
and you know that really floored me.
When she's finished with my body,
yes, she said she's going to pour me down the drain.
She's a brain [x6]
