No good job  
No good town  
No roots planting you down  
Why be lost when you could be found  
By another reason to go

City lights  
So brightly blind  
Like a low lay  
Look your mind  
Stir crazy to the day you find there  
Another reason to go

Open eyes mean closing doors  
Wonder what they're waiting for  
I was waiting but I ain't no more  
Found another reason to go  
Your heart headed at me  
Don't give up easily  
When I look back all I see  
Is another reason to go

Come near or far  
No matter where you are  
There's a light that surrounds you

And if you stay strong  
Let it shine  
Keep watching, soon you'll find  
Your place and your good time  
Not another reason to go
