Take me as I am

Someone you don't know

Even in the dark

You may not be sure

Take me while you can

I can see you standing in the smoky entrance

Giving up your good intentions

CHORUS

Leave the shadows dancing

Dancing on their own

Let the moments free you now

And leave it all behind you

I'll know where you've gone

Let the world go on

Take me as I am

I may disappear

Fade into the night

Lighther than your thoughts

Take me while you can

Never knowing who or what you are until you're

Living with the unfamiliar

## CHORUS

There's a place where fear won't find you

Where your secret dreams remind you

This is all you have to know and

This is all you have to go on

Everything you have inside you

Everything you need to guide you

This is all you have to know and

This is all you have to go on

Take me as I am

Someone you could know

Even as we speak

You could change your mind

Take me while you can

Even if you shine a light into a mirror

You won't see me any clearer

## CHORUS
