"Down 2 Earth"

Visit "[Down 2 Earth](#)" on MotoLyrics.com

It's just a start, at the beginning of a new era, there's no way no use in trying to get it all done in time, we've come this far, at the beginning of a new era, we're the majority so it's worth a try, we can't lose now we just gotta choose now, we gotta choose to create a new star give birth to a new earth and make it our home, as the gypsies we are, Seattle ain't that far!

As the gypsies we are, we can find our place in history, as the gypsies we are, it's time to restore humanity, as the gypsies we are, we're gonna follow the path of trial and error to the mother, the mother we all used to hate

and again, I feel so close, to the planet we live on but no one knows, and feel the fire, feel the desire deep inside her, to breakdown the walls, believe in ourselves, release ourselves and don't forget about the books that been lying on your shelf and feel the mother earth the mother we all used to hate

As the gypsies we are, we can find our place in history, as the gypsies we are, it's time to restore humanity, as the gypsies we are, we're gonna follow the path of trial and error to the mother, the mother we all used to hate

Take us down to earth, give us back the earth, give me back to earth again...
