We got no security
But nothings certain anyway
Got to live from day to day - okay

Dedications absolute
Here we are the living proof
Face to face to tell the truth to you

[Chorus]
We came, we saw
We're ready and we're back for more
Join hands and stand
Together one for all

They steal our creativity
Sentence us to poverty
It's legal daylight robbery you see

The page was written long ago
A script for life
A minor role
Still we got time to take control, I know...
