We used to talk, we used to love  
Each other but our connection died  
We lay on beds, in a hospital without correct drugs  
To make our souls touch again

I am a ghost, I am nowhere, I am doomed  
Yes it's hard to hear  
But you swear it's the truth

We used to talk, we used to love  
Each other but our connection died  
We lay on beds, in a hospital without correct drugs  
To make our souls touch again

I am a ghost, I am nowhere, yeah I am doomed  
Yes it's hard to hear  
But you swear it's the truth

So I don't agree  
My friends, my hope, my love  
They say that I'm above this  
So don't worry boy  
Cos we are proud of you, yeah no matter what

Woah Woah  
I'll understand  
What it takes to be a better friend and man

And i just can't fall asleep  
You are the drug I need  
My history won't let me go  
Cos I'm exactly where I was three years ago

This car is wide, open and dive  
Right into the heart of the beast  
I bide my time as you devour my insides  
I lost my guts when I was a boy

I am ill, I am lost, I am doomed  
Yes it's hard to hear  
Cos I know it's the truth

So I have to agree  
My friends, my hope, my love  
They say that I'm above this  
So don't worry boy  
Cos we are proud of you, yeah no matter what

Woah Woah  
I'll understand  
What it takes to be a better friend and man  
Woah Woah  
Pictures are scared  
By loss and failure  
I think I can't perfect the art

And i just can't fall asleep  
You are the drug I need  
My history won't let me go  
Cos I'm exactly where I was three years ago  
I'm exactly where I was three years ago

Sing for, sing for the light we know  
That exists in the bottom of your lost soul  
You've got to dig it out and fight your demons too  
I know it's hard but it's something you have to do

I'll sleep well now  
Knowing my body won't ache for you
