

New Cities, The "Let It Be Clear"

Visit "[Let It Be Clear](#)" on MotoLyrics.com

Right now you're up,
You better take control of
Your mind and thoughts for
The sake of all you're made of

Getting so fueled you would be
You could be and you should be
Feeling so fueled
If only it could be clear

Right now you're up
You're running on the edge of
Your very rush or
The place that carries you up

Getting so fueled you would be
You could be and you should be
Feeling so fueled
If only it could be clear

I know something inside you sighs
To make sure you're left high and dry so
Now you can use your will to live
So you can rise above this state

Feeling so fueled, let it be clear

I know something inside you sighs
To make sure you're left high and dry so
Now you can use your will to live
So you can rise above this state
