V1:

My hands are bent and broken now
Of who I was I am not proud
I left my heart I left my head
Ran off with fools came back unfed

Pre Chorus 1:

I can't undo
The things I did before you

Chorus:

Strange I feel, the love you bring me still
I never could deserve you

V2:

You did not fault me for my scars
Walked through their fire now they're ours
I cannot see me through your eyes
But find your hand to my surprise

Pre Chorus 2:

You've seen right through
The things I did before you
