Bright red flashes in my mind
Remind me of a foregone time
Blackened faces, broken romance
Blackened faces
My broken heart has been
With memories of a loving stain
Sometimes happy then sad
I need love, love help me
Passing by the grounds of time
Memories that are only mine
Looking for love, a brand new love
Looking for love
Dreams that are hard to see
Finding a new cup of tea
Someday she must come along
I need love, love help me
I need love to conquer all
Somewhere there must be one
Hoping someday the good news
Waiting for that girl to choose
Only lonely, all I can do

Only lonely

One day she must come along

The girl as pretty as a song

A woman just spared for me

I need love, love help me

Bright red flashes

Remind me of a foregone time

Blackened faces, broken romance

Blackened faces

My broken heart has been

With memories of a loving stain

Sometimes happy then sad

I need love, love help me

I need love, love help me

I need love, love help me
