

New Transit Direction, The "Mechanical Failure"

Visit "[Mechanical Failure](#)" on MotoLyrics.com

Things we changed you long with talk
As we go on
And you know that we will never be the way the way that
you want us to be
All places, all tried
Stand by myself pass things before
I never wanna be in the pressure can

I will try to tape a hole
Only to find fault behind

We changed the long with talk
As life goes on
And you know that we will never be the way the way that
you want us to be
Without your voice
That we cannot have self esteem at all
I never wanna be in the patient can

We will put our fist to rest
Only to watch them fade away
We can find the light of chains in the train
Only to leave all ourselves
I just watch it fall away
I just watch it fade

We will put our fist to rest
Only to watch them fade away
We can find the light of chains in the train
Only to leave all ourselves

Ever fall in light, yeah
Ever fall in light, yeah
Ever fall in light, yeah
Ever fall in light
