How did you know what I needed  
How did you see what I seeing  
How'd you ever come to be ever with me?  
Always beside and with me  
How do you know to hold my hand and  
how you said you understand how I'm inside and  
can not stand to be with me  
Always beside and with me  
Something to hide, someone to stay  
Something to take me high and way  
Someone to understand what it is to be with me  
You were beside and with me  
How did I not see you then, how'd you know to come  
again  
when I was hurting and you were then to be with me  
You are inside and with me  
Something to hide, someone to stay  
Something to take me high and way  
Someone to understand what it is to be with me  
You were beside and with me  
Always beside and with me  
You are inside and with me  
How did you know what I needed  
How did you see what I seeing  
How'd you ever come to be ever with me?  
You were beside and with me  
Something to hide, someone to stay  
Something to take me high and way  
Something to hide, someone to stay  
Something to take me high and way  
Someone to understand what it is to be with me  
You were beside and with me
