Visit "[Alone With 20 Bucks](#)" on MotoLyrics.com

(videodrone)

Living, barely surviving
Freebasing life till it's end
Divided soulless vices
Death before life could begin

Evil dollar bills, life stood still
A tumor removed from your brain
Prescription refilled, a cure for my ill
Blood stains painted over again

You tell me how to think
You tell me how to feel
'cause I want to know what is real
Is anyone real?
Adolescent, nothing's exciting
Deception from satan's end
Enticing voiceless vices
Suffocate before life could begin

Evil dollar bills, life stood still
A tumor removed from your brain
Prescription refilled, a cure for my ill
Blood stains painted over again

You tell me how to think
You tell me how to feel
'cause I want to know what is real
Is anyone real?
