Oh when my battery
It just runs out on me
I like to take a walk about
And so it came to pass
I saw you on the grass
Baby, in the buzzlin crowd

Some people looked strange
Some people looked deranged
Dome people are just looking through you
So when you look at me
I wonder who you see
Now now, who I am to you

Take a trip under the ground
And take a little look around
Baby don't you know
People come and go
Oh just like the rainbow

Some people like to meet
Some people on the street
Some people like to hang around
Oh now, some people like to speak
Some people tongue and cheek
Now now, they try to cut you down

Take a trip under the ground
Take a little look around
Baby don't you know
People come and go
Oh just like the rainbow

Take a trip under the ground
Take a little look around
Baby don't you know
People come and go
Oh just like the rainbow
