Look around take it in watch the moves now  
Buzz'n round like a fly by a light blub  
Watch'n words bounce around to the beat of my drum  
Nothing said when you are under my thumb

Take a ride in the night sky  
Looking good silhouette with my x-ray eyes  
Be alive and let it slide and watch the sunrise  
I know where it's at.

In the light of the sun  
There is part of me there  
In the middle of it all

In the light of the moon  
There is part of us there  
In the middle of it all.
