amazing days flew away to a better a place
imagine a face shattered by the damage it makes
i travel in place i could escape now
i've memorized the map but i couldn't find my way out

im sittin here with my knees at my chin
bleedin from within singing along with my sins
wellknown tones from your own home zone
get your own home grown take it all and get all stoned

a backspin made my sight quite dissy
with a life like disney the mic might miss me
i'm walking down the lane to get my memories back
you can dream about the future but don't forget your
past

remember the fact that your life is a dirt road
you make prints everywhere you go
so a menace put on hold my mouth makes it dirt
all alone in a grey room in a grey world

amazing days flew away to a better a place
imagine a face shattered by the damage it makes
i travel in place i could escape now
i've memorized the map but i couldn't find my way out

amazing days flew away to a better a place
imagine a face shattered by the damage it makes
i travel in place i could escape now
i've memorized the map but i couldn't find my way out

the world pass my view i might laugh at you
but it's my pain inside it makes me acting rude
a magic booze so i can swim in my sorrows
i might loose today but imma win tomorrow

a broken arrow is stucked in my heart
from the love that i gave then ripped apart
i'm searching for my blizz cause i'm worthy of this
but i only get the hardest hugs and the dirtiest kiss

im burning with my pen in the corner of shame
i've tried all the doors but all the doors are the same
im hearing the rain but can't see it fall
cause there is no window in my room just a grey wall

all i ever wanted want a world who treat me right
but all i ever got was a girl leaving my side
all i ever wanted want a world who treat me right
but all i ever got was a girl leaving my side

amazing days flew away to a better a place
imagine a face shattered by the damage it makes
i travel in place i could escape now
i've memorized the map but i couldn't find my way out

amazing days flew away to a better a place
imagine a face shattered by the damage it makes
i travel in place i could escape now
i've memorized the map but i couldn't find my way out

i can't find my way out
i can't find my way out
amazing days

amazing days flew away to a better a place
imagine a face shattered by the damage it makes
i travel in place i could escape now
i've memorized the map but i couldn't find my way out

amazing days flew away to a better a place
imagine a face shattered by the damage it makes
i travel in place i could escape now
i've memorized the map but i couldn't find my way out

amazing days flew away to a better a place
imagine a face shattered by the damage it makes
i travel in place i could escape now
i've memorized the map but i couldn't find my way out
