

## Villagers "Ship of Promises"

Visit "[Ship of Promises](#)" on MotoLyrics.com

You see a mask from your window at night  
So you wake and you go outside  
And you put it on  
And they treat you in a different way  
But you can't understand what they say  
After you've put it on

So a change is never an end  
Cause this is happening all over again  
And it's been days since I left  
On this ship of promises

Another day, another denial  
Every longing's up on trial  
So you learn to put it on  
As the captain calls everyone in  
To the dance hall and the night begins  
You have to put it on

All these visions of a welcoming party, pretty party  
Have been lost, cause it's the same since I left  
On this ship of promises

All the churches I remember well  
Clocking in and out to the sound of the bell  
We just put it on  
It takes you in, it scrubs you clean, it sanitizes every  
dream  
And you put it on  
You just put it on

But I'll meet you in between  
What I say and what I mean  
And we will make our own mess  
On this ship of promises  
Cause it's the same since we left  
On this ship of promises  
We just could not care less  
On this ship of promises  
Don't look back
