Ooh. You should have seen your face. it looked so out of place.

And when you're wrong you're really wrong. And now I'm living it.

How much longer were you gonna wait to let me know, that you wanted This Ending.

It's going to take some time to show, any signs of mending.

You, are always making the rules. I hate to break you the news.

But when I'm gone I'm really gone. And you'll be living it.

How much longer were you gonna wait to let me know, that you wanted This Ending.

It's going to take some time to show, any signs of mending.

I wanna make you feel the way you made me feel, when you told me that you loved somebody else.

It wasn't fair. It wasn't nice. It wasn't called for.

Just another case of think of yourself.

Ooh. I'll never drop your name. Our time outlasted our fame.

It's been so long how long? Since we've had any peace.

How much longer were you gonna wait to let me know, that you wanted This Ending.

It's going to take some time to show, any signs of mending.

How much longer were you gonna wait to let me know, that you wanted This Ending.

It's going to take some time to show, any signs.

.
