These pictures

Etched into my mind

Still shots of

My intolerance

No more will

I take this

No more will

I fake this

Another second and it's gonna cause a break down

Another second and I think I'm gonna break out

No one's gonna help me now

No one's gonna help me now

You f***ed my heart

You broke my trust

You stripped away the layers of my sick sick heart

You broke my heart

You f***ed my trust

You stripped away the layers of my sick sick heart

These pictures

Etched into my mind

Still shots of

My intolerance

No more will

I take this

No more will

I fake this

Another second and it's gonna cause a break down

Another second and I think I'm gonna break out

No one's gonna help me now

No one's gonna help me now

You f***ed my heart

You broke my trust

You stripped away the layers of my sick sick heart

You broke my heart

You f***ed my trust

You stripped away the layers of my sick sick heart

God please lift this burden from me

God please lift this burden from me

God please lift this burden from me

God please lift this burden from me

Pain digging deep like a razor twisting through my soul
non stop

Bleeding of my heart causing loss of motivation to see
each new day

Through that door that you walked through when you
left me

And you again 'til that bitter end

The time has come
Your game is up
I never knew that you could be so f***ed up
You f***ed my heart
You broke my trust
The day I met you is the day that I f***ed up
God please lift this burden from me
God please lift this burden from me
God please lift this burden from me
God please lift this burden from me
When you find me
Will you save me?
You f***ed me
God help me
I got this feelin' burnin' deep inside of me
Will we ever see another day I guess we'll wait and see
The clock keeps tickin' gettin' slower day by day
My mind says go but inside my heart says stay
I'm goin' crazy won't you help me?
God help me
God help me please
God help me please
God help me please
God help me please
