I can never be what you want me to be

I can never see what you want me to

I can only live what I feel inside

Two steps from paradise

I can never be what you want me to be

I can never see what you want me to

I can only live what I feel inside

Two steps from paradise

I can never be what you want me to be

I can never see what you want me to

I can only live what I feel inside

Two steps from paradise

Two steps from paradise

Take a minute step back and look at what you've done  
to the world

And maybe you don't care right now but it'll just come  
back to bite you later

I stand alone as I fight my own losing battle

Spit from the tree tops

Rain down humanity

I can never be what you want me to be

I can never see what you want me to

I can only live what I feel inside

Two steps from paradise

I can never be what you want me to be

I can never see what you want me to

I can only live what I feel inside

Two steps from paradise

Two steps from paradise

Another second think back remember what you said to  
us all

And maybe we don't care anymore what you say 'cos  
we know what we'd die

for

We stand alone try to follow our own hopes and visions

we bear the stares

Keep your humility

I can never be what you want me to be

I can never see what you want me to

I can only live what I feel inside

Two steps from paradise

I can never be what you want me to be

I can never see what you want me to

I can only live what I feel inside

Two steps from paradise

Two steps from paradise

One by one they all fell down

Take a look around yourself

One by one they all fell down

Take a look around yourself

One by one they all fell down

Take a look around yourself

One by one they all fell down

Take a look around yourself

One by one

One by one

One by one

One by one

One by one they all fell down

Take a look around yourself

One by one they all fell down

Take a look around yourself

One by one

One by one

One by one

One by one by one by one by one
