First she came right into my life  
Know my life wasn't much of a life  
Couldn't believe this could happen to me  
Oh, who could ask for more?

Just let me know  
Just let me know, oh oh  
What you want from me?

Were a friend when I hadn't a friend  
One who I could always depend  
Couldn't believe this could happen to me  
Oh, who could ask for more?

Just let me know  
Just let me know, oh oh  
What you want from me?

Wish I knew what you were thinking deep inside  
Feel, those feelings that you hide  
Wish in you I could confide  
All my hopes, my fears, my love

First she came right into my life  
Know my life wasn't much of a life  
Couldn't believe this could happen to me  
Oh, who could ask for more?

Just let me know  
Just let me know, oh oh  
What you want from me?  
What you want from me?  
What you want from me?  
What you want from me?
