Virus spread by carrion minds
The product of these manmade sins
Inhaling the waste of warfare
Humans dying in a mutant lair
An outcast from the warlord clan
Driven to walk the barren land

Malignant massacre

Absorbing membranes and the flesh
Rotting bodies with stagnant breath
Aching from the pain inside
Running sores are hard to hide

Puss filled growths burst and bleed
Maggots within the tumours feed

Malignant massacre

Ripened sores begin to fester
The symptoms of terminal cancer
Mutants from the sewers ascend
Stumbling blindly to certain end
Screaming out in instant pain
Predators eat the last remains

Malignant massacre
