Finding the existence we seek  
Bury the dead and the weak  
Warlord controlling the land  
Joining the ranks of the damned

They decide who lives or dies  
Rulers of the war torn sky  
Warlords from the holocaust  
Power from the mega force  
Remnants of the battle zone  
Savage captors watch and roam  
Decaying life is what is left  
Virus disease massive death

Rising up from the blast  
Reminiscence from your past  
Life is a noiseless silence  
Ruination with violence
