So here we stand again

Like dust on mother earth

And we hide our faces in our dreams

Only emptiness where angels flew - high on golden wings

And the voice of god has vanished now - lost inside our dreams

But the only way to go is heaven

All we can do is pray

In the darkness we stand with the world in our hands

And we pray

For a better tomorrow

We wait

Far beyond the horizon

There's a sound in the sky

The voice of glory I hear a silent cry

When the heroes of yesterday are gone

All we can do is pray

In the darkness we hide and we wait for the light

And we pray

Oh we pray

Let us pray

I've seen the darkside of the moon in my dreams

Now I know it ain't a place to live for us all

All our gods creation is dead an gone

Now we stand like children all alone forever

All we can do is pray

Forever and forever and forever more

For a better tomorrow - we wait

Pray

There's a light in the dark

And it's shining so bright on our way

Still there is hope on our way

And we pray

Oh, pray
