"Shine On"

Visit "[Shine On](#)" on MotoLyrics.com

We drive, we drive, we're riding on through the
universe

We've come to reach our destination planet earth

We come, we run, you cannot see us, flying in our
spaceships, shooting 'cross the sky

We explore and we all know what this is about
for us all

So many light years we have travelled far from home

Someday we'll be there I know

Shine on, Rising star

We travelled such a long way

But still you seem so far

Shine on, Rising star

for our belief in unity at heart

Rising Star

Come on and shine

Living was torture and dying release

A declining world, no future, no hope

We were passing the point of no return

So many light years, still we travel on and on

And someday we will call you home

Shine on, Rising Star

Diamond in the distance, still you seem so far

Shine on, Rising Star

Forever light the darkness in our hearts

Rising Star, Rising Star

Salvation, Damnation

We crawl across the sky with pain

Forever we will fly

Out in the darkness

There's a never ending light

Still we are far away

But we'll be there one day

Someday we will call you home

Shine on, Rising Star

We travelled such a long way

but still you seem so far

Shine on, Rising Star

Forever light the darkness

in our hearts

Rising Star, Rising Star

Shadows in the darkness, so far away from home

Standing all alone, no one there beside me

Shadows all around, so far away from home

I know I'm not alone, it seems we're lost in space and
time

Shine on

Shine on now, and warm the tears
we've shared through years
It's our prison, final reason for the freedom
and the glory that we feel
Are you for real?
Shine on, Rising Star
Diamond in the distance
Still you seem so far
Shine on, Rising Star
Forever light the darkness
in our hearts
Rising Star, Rising Star
Shine on, Rising Star
Come on and shine for us
Shine on, Shine forever more
Shine on, Our survival
Rising Star, the last chance for us all
The only hope for future and a home
For us all
For us all
Come on and shine, Rising Star
