"Hold Your Eyes"

Visit "[Hold Your Eyes](#)" on MotoLyrics.com

I got what you want, you know I got what you need

See me come along my baby

gonna give you some disease

I'm gonna see you in the morning

I'm going to feel you through the night

I'm

close your breathe and hold your eyes

trying to suprise, you know what I mean [x4]

so I find you in the morning, lying on the floor

the break up dress inside your mess, going see you
once a more

can I have all your digits, get a party on the floor

baby I got something for you baby gonna leave you all
alone

Close your breathe and hold your eyes

trying to suprise, you know what I mean [x4]

Can you hear me, hear me, hear me

Close your breathe and hold your eyes
