Mister straw man loves his argument
And he's so proud to pay his congressmen
We all fear Al Qaeda and the wrath of God
We bought your flag pins on Nine Eleven
And now you want to save us with fear

Are we not free
American nightmare
Are we not free
American nightmare

Mister C.E.O. loves his tax reductions
And he loves his mistress more than his whore
His employees are underpaid as fuck
But he pays your government well
And you want us to buy in as well

Are we not free
American nightmare
Are we not free
American nightmare

Well if I am a terrorist
My terror is just common sense
And my time bomb is democracy
So go screw yourself W.
