

Offspring, The "One Hundred Punks"

Visit "[One Hundred Punks](#)" on [MotoLyrics.com](#)

They customised their gear and synchronised
(They)flame out in the streets with flame in their eyes
Guerilla operator ain't heard of cool
Check out any wall - one hundred punks rule
One hundred punks rule

A hundred punks run with London town
Down Wardour Street to the Soho Sound
Don't sleep all week only when they fall down

A hundred Rumble boys and Tumble girls
Protected by steel in a private world
Tomorrow's famous faces advertise today
And the studs on their back say
One hundred punks rule

A hundred punks run the loaded gun
They look so sharp they look like one
If you ain't got the look you'll never be one

A hundred punks run with total suss
A hundred good mates you know you can trust
There's never no bother and there's no fuss
Check out any wall - one hundred punks rule
One hundred punks rule

And Jimmy's no.101 knows one day he'll be One
Watch him - watch him Go!

A hundred punks run the leather army
I know whose by my side not at home with TV
Even when I'm down I hear them sing for me
Check out any wall - One hundred punks rule
One hundred punks rule

Check out any wall - One hundred punks rule
One hundred punks rule
Check out - One hundred punks rule O.K.
