Baphomet the goat of a thousand young  
Horns thrusting upward in moral defiance  
Leviathan the holy trinity denied  
Perpetual of our noble Satan

I, the redeemer withstand my assurance  
To gracefully open the seventh gate

Ring the goat's head bell, purifying the air  
In nomine dei nostri satanas Lucifer  
Abaddon, Asmodeus Astaroth, Baphomet  
Beelzebub, Behemoth Beherit, Hecate

Wash our hands of impurities  
Drink the blood from the skulls of our enemies  
Topple the throne of the mortal fool  
What has God done for you?  
Blasphemy of the righteous church  
Celebrate in darkness  
The darkness offers confined healing  
Find yourself before it's too late

Drink from my chalice the elixir of life  
Reaching out to the four cardinal points  
Satan, Lucifer, Belial, Leviathan

Trapped behind the false moral confines of Christianity  
Your self-destructive belief system is a festering  
cancer  
It should have become extinct long time ago

Angels of blasphemy oppreser of truth  
Angels of blasphemy oppreser of life
