(David Henman)

Published by Summerlea Music, Ltd. - BMI

Look at all the places we been, and look where we are  
Something is amiss here cause we never seem to get  
very far

Now I got a feeling, a plan, some music to sing  
And I'm looking for the right words to convey the  
message we bring

If you can hear it, mmm, I'm gettin' near it, if I can say  
it

Drop your guns, and raise your hands in the air  
You're the one that started all the trouble out there

Grease me, I'm near you, blast me, I'm in your way

You're the thing in a song, that really ought to be put  
away

Now I got a feeling, a plan, some music to sing  
And I'm looking for the right words to convey the  
message we bring

If you can hear it, I'm gettin' near it, if I can say it  
Drop your guns, and raise your hands in the air

Drop your guns, and raise your hands in the air  
Drop your guns, and raise your hands in the air  
Drop your guns, and raise your hands in the air  
Drop your guns, and raise your hands in the air
