Passing by then floating to the dark  
A single moment having been delivered  
And even in reunion there is parting.  
A circle round and round made up of memories  
And as we finish, then again we start  
And at the end we're back at the beginning  
And even in reunion there is parting  
Like watercolors bleed red into blue  
One day into another, love will travel with you  
And like a feather riding on a river  
And as we journey friendships of the heart  
Are carried close within, 'til the time we meet again  
Even in reunion there is parting  
They're carried close within, 'til the time we meet again  
and  
Even in reunion there is parting.
