So tell me this.  
Where you come from is there life above unknown with  
more intelligence? .  
I'm searching now.  
Will I find you?  
Will you come to me alone?  
Not in this universe.  
So tell me.  
Was this what was meant for us to do now?  
Built for you, and from the moon down.  
A distance.  
One would never know the truth until now.  
Three for one for all to see now.  
The last abyss.  
Everything you're searching for will close the door from  
the points below.  
The voices come.  
To me they say, "A new arrival soon will be in the night  
08."  
I'm not alone to the unknown stars above.  
You're not alone to believe in what you love.  
They're not alone seeing what we have become.  
You're not alone now.  
We're not alone now.  
Come to me. Tell me.  
Please, can't you answer honestly?  
Search for you.  
To find the the truth.  
Was this life handed down by you?
