So take me away
To where the light is fading
And the Earth is shaking before me
You're walking beside me
You tell me that you've run away from home
If you could find someplace you could
Call your own I'd look forward to
A lifetime with you
But it's all so far away

(Chorus)
Take me, take me
My heart is so ready to go
Show me, Show me
I just can't wait anymore
Tell me, tell me
The time is just right
Take me anywhere but here

And we won't tell a soul
That our world is caving in
From my deepest desires
And to my predicaments
You know me, yeah You know me
The brightest stars have nothing on you, Love
Can they shine their light into my heart
From above like You?
Or whisper as soft as You?
Cuz their all so far away
(Chorus)(3x)
