Early morning waking up
and were hoping it will never stop
not quite sure what were waiting for
so, well make our way downstairs and drink a cup
well, hey well be closer than today
let me take the chance and say: I can wait
cause here we are
and here well stay
what's been so good
has gone away
so, please stay
see the trees of green outside
see my selfishness avoid your absent mind
she turned around she turned away
and she turned away from me as if to say
well, hey, well get closer every day
let me take the chance and say: I can wait
cause here we are
and here well stay
what's been so good
has gone away
so, please stay
see the world is full of wonders
don't just sit there and wonder
cause your worries and your troubles
just wont stop
cause here we are
an here well stay
what's been so good
has gone away
so, please stay
