"Off We Go"

Woke up from our sleep With the crying of a newborn
child
Floating with relief
Yet a bubble heading for a spike The sketch for a
dream
And the moon competing with the stars
Now that I can smell the rain to wash the weight from
us
'cause we'll go far - without you
We'll go far - further than you
We'll go far - without you
It is in our hearts
In our beauty that we've found tonight
Revealing receipts
But I don't wanna pay for what is mine There's scars
joining tears
What did take me so long just to find That me within me
I've left to leave it all behind
'cause we'll go far - without you
We'll go far
Misunderstood
We'll go far - without you
We're dancing down there slow
Now burning down below
Knocked down but off we go
We're here to leave you
We've found our way home 'cause we'll go far - without
you
We'll go far
Misunderstood
We'll go far - without you
We're dancing down there slow
Now burning down below
Knocked down but off we go
We'll go far
