They're all out to get you
they're all on their way
the devils haircuts cheaper than a slave
so, bleed
don't you think just feel
here we go
come on lets move
come on and get through
come on lets move
they're trying to get you
come on lets move
come on and get through
come on lets move
they're dying to be here with you
they're all out to take you
when blue skies turn to grey
see the stars they drift to rearrange
So, bleed
don't you think just feel
here we go
come on lets move
come and get through
come on lets move
they're trying to get you
come on lets move
come on and get through
come on lets move
they're dying to be here with you
you
they're dying to be here with you
you
your body so brand new
