Tomorrow's calling
Tomorrow's calling

Tomorrow's calling, we won't make it through the day
Tomorrow's calling, but we won't make it through this
day

You gotta look what happened today, stop your walking
away now
And look what happened today, stop your walking away
now

Tomorrow's calling, yesterday just came came and
burned away
Tomorrow's calling, let's just pretend its all ok
but we won't make it through the day, no we won't
make it through

You gotta look what happened today, stop your walking
away now
And look what happened today, stop your walking away
now

All my doubts and all my fears have come right back
today
and all my time and all my tears will never come again

You gotta look what happened today, stop your walking
away now
And look what happened today, stop your walking away
now
And look what happened today, you've got something
to say now
And look what happened today, you've got something
to scream now
You've got something to scream now, but you've got
nothing to say now
Tomorrow's calling
