i show pitty on the human race,  
on the ignorant plenty who devote their lives to an icon  
that they've never known.  
i show pitty on eons past,  
when early man started the first civilization and human  
aggression was born.  
i show pitty on the future to come,  
when the government system will be omnipotent and  
we'll  
be worse off . . . than we are now!  
pitty, pitty, on the billions of ignorant people.  
pitty, pitty, on the masses of aggression.  
pitty, pitty, on the future centuries to come,  
on the billions of ignorant people,  
on the future centuries to come,  
on the masses of aggression.  
it's all a matter of looking at the past.  
it's all a question, are we gonna last?  
if we endure the aggression that's inside all of us we'll  
wipe  
out our own species and thus . . . the world!  
pitty!  
pitty on . . .  
on the masses of aggression,  
on the billions of ignorant people,  
on the future centuries to come,  
on the masses of ignorant people,  
on the future centuries to come
