"Unacceptable"

Visit "[Unacceptable](#)" on MotoLyrics.com

Irreducible is the word for today, plastic compounds
and nuclear waste,
What the hell's the matter with the people on this
planet?
Have we all gone insane?
The stigma of industrial progress killing us over and
over again,

It's one part per trillion... unacceptable,
One part per billion... unacceptable,
One part per million... unacceptable,
This mammoth pogrom set upon us courtesy of the
USA,

Inexcusable are the men before our time, I'd like to kick
their ass
for what they left behind,
Cancer-causing chemicals, ozone-depleting arsenals,
we're all gonna fry,
So put your head between your legs and kiss your ass
goodbye,

One part per trillion... unacceptable,
One part per billion... unacceptable,
One part per million... unacceptable,

One part per billion... unac(fucking)ceptable (x infinity
