No sun for the gray children  
Waiting to catch the strange  
Airy notions of that place  
Now their evolutions  
Means their brain mutations

The wider is the comprehension  
The deeper and stronger is the illusion  
They're no more material  
Since they're invisible

High pressure  
Inside me  
Erasure  
I'm empty

With their talk  
They fill me  
Now I walk  
So brainy

Who's in my head hiding themselves?  
It hurts me so, it's a brain scan  
Who's it instead, instead myself  
I hate it so, it's a brain scan

Creeping in your double mind  
There's nothing they can find  
You've lost all your energy  
Not able to set you free

They will own you just like me  
Just like me  
Just like me  
Just like me

High pressure  
Inside me  
Erasure  
I'm empty

With their talk

They fill me  
Now I walk  
So brainy

Sometimes I feel their cold presence  
Checking my mind, it's a brain scan  
Sometimes my soul can't reach a sense  
This head is mine, it's a brain scan

Don't ask 'em to give a break  
You can't even close the gate  
Passing through both hemispheres  
Searching in all memories

Knowing what's inside of me  
Side of me  
Side of me  
Side of me

Perceptive  
Entity  
Emotive  
Synergy

Hyper-detection  
Suck out the reason  
Is there something I could feel?

Trans-lucid language  
Reflect the new age  
Words are a limitation

Locking me out of my skull  
Something without physical  
Disturbing my frequency  
Terminate identity

[Incomprehensible] myself out of me  
Out of me, out of me, out of me
