All systems go

The jailship is flying high
From the ground to out of sight
They pay their crimes, locked inside
Where they go, the judge knows

They did to many murders
Then fell into the crater
They made too many speeches
Against what the people believe

Getting the no limit sentence
For them it's the last stop
The treason made upon them
Upset 'cause there's no way to return, return

All systems go
Blow the reactors
But where do we go?
We don't know!

The prisoners, looking mad
There's no color aboard this flight
Computer station look them all
Deep in the hole too many echoes

The space jail center program
Recorded, numbered, classified
This bunch of desperate guys
Changing to sub-rat humans

And then in special cases
You've gotta be quiet
If you're not what they want
They're gonna throw you out in space, in space

All systems go
Blow the reactors
But where do we go?
We don't know!

Cylindrical habitat modules
Let me out of here
And I heard my name
It's time they said !
Forgotten in space !

Dressed with a skin tight pressure suit
Swimming in the universe
It's the best place you can be
It's the last place you will be, will be

It's boring to spend time
In jail with no gravity
Suspended in nothingness
Awaiting your own liberty

Just one hour, not too much oxygen
Just one hour, not too much oxygen

Hydrocarbonic smog, methane ice crystals
Ultraviolet rays in the galaxy core
Rotations and orbits of somebody
Atoms and molecules through my body

Just half an hour, not too much oxygen
Just half an hour, not too much oxygen
You're forgotten in space
You're forgotten in space, in space!
