Me and my guys are trying to keep it high
We'll play all night for you
I'm banging my head 'til I'm dead
As long as you move

We're on the fast way
Delivering the best that I can
Can you see what I'm doing?
Running from day to day just to let it go
Come on, move your assholes

Stand up, right now, kill

I've got the command, did you understand
Attacking is the only way to win?
Awaiting the war day and the inflammation
You're the first who will be burning
If you see the storm, no time to go down
That's why I'm screaming

Stand up, right now, kill

No pleasure, the pain comes down here
No return, don't look back, there's no tomorrow
And if you're a fucker and don't believe it
I'd say fuck off and die, fuck off and die

I've got the control with my heart of stone
I feel the hades in the air
The vibration is in my bones
And noise keeps the thrill
The adventure has just begun
No religion in this place

Stand up, right now, kill

No pleasure, the pain comes down here
No return, don't look back, there's no tomorrow
And if you're a fucker and don't believe it
Fuck off and die, fuck off and die, die

[Incomprehensible]

You're waiting for that moment
Forget it and don't lose your time
Don't want to become like that

There's many times to raise hell
There's many ways to live your life
Together, we staying for yell
Don't break your fever

I've got the control with my heart of stone
I feel the hades in the air
The vibration is in my bones
And noise keeps the thrill
The adventure has just begun
No religion in this place

So if you need religion or a God to believe
So if you're a straight guy in the eyes of society
If you are a loser or just a fucking wimp
You say fuck off and die
