High, some positron
speeding ion
cruising along

low, down inward flow
magnetosphere

negative glow

now, what's going on

Motive, unclear
There's something wrong

Yes, hypnotronik

Polarity
Rising sun
No, guide lining lead
Generator
Breaks over me
Lay down, here comes
So close to the core
The negatron

Maybe plan a-1 should be
to make a b-line out of here
sub-electrosquad

of vagabond
ultra matter
out, get out of here

nucleonik
out, get out of here
vacu-vampire

you magno void

damn negatron
