we'll be back, right after this!

following the story
on my monitor
only flat colors
no more saving glory
black and white distortion
back and forth all day
a fine-tuned deception
I am shocked in waves
it just brings me down
who is right? what is wrong?
where's the second chance?
looks just like the same song
and the same old dance
storm the desert home-land
this one's gone too far
we hold peace in one hand

so, every channel's the same
in the other...war!
it just brings me down

what future? for who's gain?
and the answer is?
B. blown-up in flames
same weird game show quiz
A. global destruction

C. polluted oceans
none of the above
D. seas of disease
