all under one command
clouds overcast the land
infinite division
patterns of flat spiral
chaotic creation
spinning a triangle
wind on the schizosphere
nuage fractal appears
out there!
mutating whole numbers
dynamic intruder
viruses organize
one simple memory
systems are compromised
in every theory
all random elements
become determinants
out there lives someone
we get lost
pirate space kingdom

in this chaos
too soon for us
to be in touch

something about the code
salvation's on it's way
tomorrow we will know
cloud of all destiny
in the light of today
ghost of reality
nobody can detect
the butterfly effect
