high in his tower  
power of powers  
no one can reach him  
none shall defeat him  
down with the hated

quantum super state  
quantum hyper phase

core the atom  
configure the clone  
undergo process  
unforseen effect  
alter the structure  
shell of sub-matter

quantum super state  
quantum hyper phase  
quantum shadow-self

duplicate  
replicate  
multiply  
subdivide  
modulate  
harmonize

quantum super state  
quantum hyper phase  
quantum shadow-self...
