

Voivod "Tornado"

Visit "[Tornado](#)" on MotoLyrics.com

Nature deadly twisters
War of winds strikes again
You live in a nice neighborhood
As nice as it will be after

They drop down from the clouds
Completely out man's control

Some day it's gonna catch me
The tornado is right behind
It picks me up to overseas
The tornado is right there
Tornado, tornado, tornado, tornado

Cumulonimbus storms arrive
Lightning flashes a hundred miles around
Electrical collision course
Creates the elephant trunk

Creeping and looking for your home
Sucking anything from the ground

Some day it's gonna catch me
The tornado is right behind
It picks me up to overseas
The tornado is right there
Tornado, tornado, tornado, tornado

Go 25,000 feet in the air
The deadliest of all thunderheads
The strong winds and the vacuum
Are gonna take you to the heart of the storm

Moving and turning
No escape, you disappear
It rips you off, keeps you in
Rises you up and pushes you out

Into the guts of the tornado
Get high by the suction of the funnel
Spinning at 300 miles an hour
And trying to outwit this monster

Moving and turning
No escape, you disappear
It rips you off, keeps you in
Rises you up and pushes you out

The frontal attack, now is in the past
Is it finished or is it going back?
No one knows, where it goes
Am I safe? Am I gone with it?

Running scared

Do it quickly, if you see it
There is no time for a warning
The tornado has struck, hope you have some luck
Dust will make you blind, nothing you can find

Running scared

Tornado, tornado, tornado, tornado
Tornado, tornado, tornado, tornado, tornado
